

MVS SOLUTIONS, INC.

Company Overview

MVS Solutions, Inc., a privately held company, is a technology and large, small and medium enterprise (SME) Development Company and Consulting Firm focused on the biotech, chemistry, life sciences, medical technology and related industry sectors.

MVS Solutions is a unique synthesis of business and enterprise insight and technology acumen. As a technology development company, we develop, acquire, in-license and out-license products and technologies on behalf of our clients, ourselves and our partners. As a corporate and enterprise development company, we build comprehensive operations, structures and models to support early-stage organizations, small and medium enterprises (SME), and technologies as well as providing customized enterprise and management consulting services.

Technology Realization™ is our proprietary approach to the evaluation of technologies, market positioning, business and enterprise models, management teams, regulatory guidelines, competition, expansion strategies and risks. MVS Solutions provides the appropriate framework and experience for our clients to realize and achieve their enterprise development and technology goals.

MVS' core technical expertise includes: (1) Medical Devices; (2) Medical Technology; (3) Chemistry – particularly at the interface of the life sciences, materials sciences and environmental sciences; and, (4) Molecular Biology.

MVS' core enterprise expertise includes: (1) Emerging, Small and Medium Enterprise Strategy, Planning and Funding; (2) Marketing for Science and Technology Based Enterprises; (3) Intellectual Property Development and Management.; and, (4) Management Consulting.

MVS' industry experience includes both established and emerging enterprises in the biotech, chemistry, pharmaceutical, life sciences, medical device, medical technology and related industries.

MVS also provides access to funding, investment capital and investment banking services for companies in the life sciences, medical technology, healthcare and related industries. MVS also offers consulting and professional advice on the development, funding and acquisition of new businesses and new enterprises.

Our Customized Services

MVS tailors its enterprise and technology development services to its client's and customer's needs. MVS engages and successfully resolves both small and large projects. MVS' technical problem solving is an integrated multidisciplinary approach that utilizes biology, chemistry, engineering and information technology.

Our strength in enterprise development results from 40+ years of hands-on experience in creating value for large, small, medium and early stage enterprises.

Our commercial strength lies in our expertise in integrating science, technology and business. Our customized technical, business and enterprise services are available to business, government and nonprofits in the biotech, chemistry, pharmaceutical, medical device, environmental, healthcare, and related industries.

What makes MVS Solutions unique is our emphasis on relationship building. We work closely with our clients to target and resolve critical key issues. Our customized service approach reflects the unique objectives and goals of each and every client.

Our clients continue to choose us because we ask the right questions and then we listen...

...we listen carefully.

Our Clients

MVS Solutions has earned an excellent reputation for applying its technology (biotech, chemistry, life sciences and medical technology) and management know-how, problem-solving skills and experience to a diverse range of clients and industries.

MVS has established a solid track record of successful engagements and projects. We're proud and excited by the groundbreaking work we do every day. We see the additional knowledge and skills we've acquired along the way as a fertile background for cultivating new ideas, providing unique solutions and identifying new opportunities for our clients.

Our customers and clients include both small and large enterprises. MVS Solutions is professional, experienced and proven. Our clients and customers include:

- Small and Medium Enterprise (SME)
- Fortune 500 Companies
- Startup and Emerging Businesses
- Venture Capital Firms & Investment Companies
- Pharmaceutical & Consumer Product Companies
- Medical Device & Medical Technology Companies
- Life Science & Biotech Companies
- Chemical & Engineering Companies
- Natural Products & Environmental Companies
- Manufacturers & Service Organizations
- Nonprofit Organizations
- Government and NGOs

- Law Firms

Facilities

Our corporate office is located in Portsmouth, New Hampshire and our lab facility is in Northborough, Massachusetts. Our enterprise and business development, focus and strategy is local, regional or global depending upon the particular needs of our clients.

Our location in the Metropolitan Boston and Cambridge Area provides us with rapid access to some of the finest universities, libraries and research centers in the world.

MVS has a well-equipped and modern laboratory facility. The laboratory is well suited for R&D and product development in the biotech, chemistry, medical device, pharmaceutical, environmental, materials and life sciences sectors. Due to our location, MVS also has additional access to sophisticated instrumentation and equipment for successfully addressing and resolving your technology needs and goals.

The MVS Realization Team

- More than systems
- More than services

We deliver strategic solutions to support your total enterprise.

The MVS Realization Team is spearheaded by Dr. Louis M. Scarmoutzos.

Dr. Louis M. Scarmoutzos, President and Founder

Dr. Scarmoutzos has over seventeen years of industrial experience ranging from small startup ventures to large corporate entities. He is formally trained as a Ph.D. Scientist and was educated at Boston College, The Pennsylvania State University and Harvard University. As President and Founder of MVS Solutions, Inc, he has served in an advisory capacity to both the private sector and government.

Dr. Scarmoutzos is currently a Board Member of Reactive Oxygen Systems, Inc., a medical technology company; Scientific Advisory Board Member of SolmeteX, Inc., an environmental remediation company; Scientific Advisory Board Member of PolySun, Inc., a photovoltaic technology company; and, is on the Scientific Advisory Board of SupplementQuality.com, a dietary supplement quality initiative. He also serves as an Advisor to the Gerson Lehrman Group, a Principal Advisor to the Los Angeles Research and Technology Association Life Sciences Technology Group (Larta), a Principal Advisor in the National Institutes of Health Commercialization Assistance Program (NIH-CAP) and is currently a member of the New Hampshire Biotechnology Council (NH Biotech Council).

After receiving his Ph.D. in Physical Organic Chemistry and working in industry for several years, Dr. Scarmoutzos focused on strategic opportunities in the biotech, chemistry, pharmaceutical, medical device, environmental and related industries. He has hands-on experience in technology development and commercialization, enterprise identity creation, strategic planning, business, operational and marketing plans, risk capital funding and intellectual property portfolio development. Dr. Scarmoutzos continues to serve as an expert witness in several chemistry related litigation cases.

Dr. Scarmoutzos has considerable expertise in ensuring that an organization's technical and business efforts are continually well integrated and directed towards commercial success.

In addition to our in-house staff, MVS maintains an active network of experienced and highly qualified professionals with expertise in management, legal, human resources, regulatory and clinical affairs, reimbursement, finance, business and enterprise development services.

MVS Solutions can provide you with the affordable and expert services usually accessible to only large enterprises and Fortune 500 companies.
