

Client Testimonials **MVS Solutions, Inc.**

"As a biotech company participating in the NIH commercialization assistance program, we were advised, mentored, and challenged by Dr. Lou Scarmoutzos from MVS Solutions. His profound knowledge of reality and perception in the relationships between small biotech companies and big players helped us in focusing our strategic and tactical thinking and business planning. We now look forward to further collaboration with Dr. Scarmoutzos and MVS Solutions."

Joseph M. Backer, Ph.D., Chief Executive Officer, SibTech, Inc.

"As we approach the end of our first year working together I wanted to write and let you know that MVS Solutions has proven to be an excellent technical resource and business partner for Combe. The quality and breadth of insights provided by you and your company on a variety of short term and long term projects have been invaluable in allowing Combe's R&D group to make critical technical decisions on a timely basis. It is a pleasure working with you and MVS Solutions and I anticipate continuing building on what has been a very successful first year."

Dr. John R. Howard, Senior Vice President R&D, Combe Inc.
(www.combe.com)

"We worked with Dr. Scarmoutzos through a NIH-sponsored program. The singular focus of Lou's professional approach is the success of the client."

Dr. Phil Harnish & Dr. Peter Seoane, Founders, Eagle Vision Pharmaceutical Corp.
(www.eaglevpc.com)

"The MVS team was contracted for technical evaluation of the production steps for a particularly challenging custom chemical. They were responsible for reviewing the various steps of the project, associated production records, site analysis and providing recommendations for improvements. Their responsiveness and thorough evaluations led to completion of the project on time and below budget. Dr. Scarmoutzos' technical expertise and creative approach to problem solving helped improve yields beyond previously achieved levels. His invaluable insights into optimization of the overall process were well received and will be extremely helpful for future processes. We would definitely consider MVS Solutions as our expert chemistry resource for future projects."

Heather Corcoran, Senior Analyst, Biogen Idec Inc.

"Piedmont Pharmaceuticals had the challenge of sourcing a unique active ingredient (Active Pharmaceutical Ingredient, API) for a new product. The API needed to be produced in a cGMP facility. Piedmont had little success in finding such a plant in the U.S., as the raw materials used to produce the product came from natural resources. Dr. Louis Scarmoutzos of MVS Solutions provided an exhaustive list of possibilities in the US, but more importantly in the European Community and the Far East. Piedmont was able to use this information and select a manufacturing facility that met our needs. We are currently using this facility. Dr. Scarmoutzos worked quickly and provided a detailed report from which solved our problem."

"At the end of the first year of the NIH Commercialization Assistance Program, I would like to thank Dr. Lou Scarmoutzos and MVS Solutions, Inc., for your outstanding contribution to the program ...you have provided mentoring and professional advice that made a difference to nearly forty emerging life sciences companies. You also successfully coached them and prepared them to present their business cases to the industry and to the investors at Larta's Venture Forum in Los Angeles, one of the largest showcases of emerging life sciences and high-tech companies in the world. I am looking forward to continue working with MVS Solutions in the future."

*Neven Karlovac, Ph.D., Vice President Technology Commercialization Programs, Larta
(www.larta.org)*

"Having worked with MVS SOLUTIONS on an early-stage developmental project for well over one year, I am pleased to report that my initial concerns about my choice of strategic planners have been replaced by a hard-earned respect for the work heretofore produced. More importantly, I am extremely grateful to have found a highly-skilled, experienced team which has shown itself to be highly entrepreneurial and creative. Given the unexpected rigors of early-stage medical developmental research and strategic implementation projects, I can think of no better team than that of Dr. Louis Scarmoutzos and MVS Solutions, as their background gave our project added credibility."

*Jim Nowak, Private Investor & President, Site Systems, Inc.

"As a small company, we need inventive, knowledgeable and efficient product development consultants. MVS Solutions was a perfect fit. They worked closely with our team to understand our needs, and came back with practical solutions. We certainly hope to continue to work with them in the future."

*Micah Rosenbloom, Chief Operating Officer & Co-Founder, Brontes Technologies, Inc.
(www.brontes3d.com)*

"We are an environmental separations company that constantly encounters unique, off-the-beaten-path technical challenges from our clients and customers that they are unable to solve by themselves. When we need complex problems solved, we turn to the best technical talent available. Dr. Scarmoutzos and his team's interdisciplinary approach to problem solving provides us with timely cost-effective solutions to these challenges allowing us to continue to remain competitive in today's marketplace. The breadth and depth of the technical expertise at MVS Solutions is unparalleled. MVS delivers. MVS has proven to us they know how to solve those tough problems and to do so with an underlying attention to the business and to technology commercialization. MVS really does provide a value-added service to my company. When we need innovative thinking that leads to proprietary solutions, we call on MVS Solutions."

*Owen E. Boyd, CEO, SolmeteX, Inc.
(www.solmetex.com)*

"The Tradeworks Group is involved in the development of proprietary nutraceutical ingredients which we then sell to marketers of dietary supplements. In the last 3 years we have retained the services of MVS Solutions to help us translate and merge complex technical information into product marketing solutions. Additionally Dr. Scarmoutzos has made invaluable contributions to our intellectual properties portfolio with his vast and unique knowledge of product patent issues. When it comes to seeking expert consulting assistance on scientific projects we rely on MVS Solutions."

*Peter S. McNeary, President, The Tradeworks Group, Inc.
(www.tradeworksgroup.com)*

"MVS Solutions provided an excellent and thorough review of the technical content in DuPont's Street Smart Chemistry book. The service provided was superb and only enhanced the credibility of our technical content."

*Mark Cluff, Project Leader, DuPont
(www.dupont.com)*

"Our experience with the MVS team has been incredibly positive. We have invested for years in the development of an innovative, thin film coating technology to provide high quality, low cost anti-reflective coatings. We reached a point where our in-house expertise and equipment needed to be complemented. After a search of potential groups to assist our efforts, we selected MVS."

"MVS has provided timely and thorough completion of the studies that we have requested and has provided creative inputs to problems that we have encountered during the development process. In one particular study, our hypotheses took us a step backward. After discussing our joint thoughts on the cause of this setback, MVS ran another study before we had a chance to request it. This initiative kept us on our development timeline. We view MVS as an integral member of our team who has added considerable value to complete the development of our innovative technology."
